Un secolo di cambiamenti epocali, rivoluzioni tecnologiche e culturali, trasformazioni assolute nei modi di vivere e di pensare. Ma anche un racconto di fedeltà a valori che vanno oltre il tempo, continuità nella crescita, capacità di unire tradizione e innovazione, italianità protagonista nel mondo. Una storia di persone che giorno dopo giorno, contribuiscono al successo di un'azienda e soprattutto di un modo di immaginare, creare e vivere la casa: Calligaris.

È il 1923 quando Antonio Calligaris inaugura un piccolo laboratorio a Manzano, in Friuli: un territorio in cui la lavorazione del legno risale al Settecento e trova nella sedia Marocca impagliata a mano, una delle sue espressioni più iconiche.

Inizia così un percorso che nell'arco di un secolo, attraversando cambiamenti epocali nella tecnologia, nel design e negli stili di vita, conduce Calligaris a diventare una realtà di riferimento mondiale nel campo dell'arredo per la casa.

Fra gli anni 1950 e 1970, sempre guidata dalla famiglia Calligaris, l'azienda si amplia e si trasforma in un'industria moderna, senza perdere l'ingegnosità e la cura per il dettaglio che derivano dalle sue origini artigianali, né il legame con la materia prima più calda, viva e naturale: il legno.

Il decennio 1980-90 rappresenta il periodo della massima espansione del "distretto della sedia" friulano e Calligaris è protagonista di questo grande successo mondiale del Made In Italy, inaugurando nel 1998 la prima filiale negli USA. Anche la collezione si amplia, proponendosi come un progetto d'arredo completo per la casa: dall'ambiente giorno allo spazio notte.

Il nuovo millennio vede Calligaris intraprendere un'ulteriore avventura, confermando la sua vocazione internazionale e le capacità imprenditoriali di sempre, attuando una nuova strategia di branding e comunicazione, con l'apertura di flagship store a Milano, Parigi, Londra, Monaco e Los Angeles.

Ciò che 100 anni fa sembrava impensabile, è oggi una realtà quotidiana per un'azienda che non ha mai smesso di credere al suo sogno, per tutti coloro che hanno contribuito a realizzarlo, per chi lo ha reso parte della propria casa e della propria vita: e la storia Calligaris continua, verso il domani.

A century of epic changes, technological and cultural revolutions, and massive transformations in how people live and think. But this is also a tale of loyalty to the values that go beyond time, continuity in growth, the ability to combine tradition and innovation, and the Italian spirit as a protagonist in the world. A tale of people who, day after day, contribute to the success of a company and, above all, a way of imagining, creating, and experiencing the home: Calligaris.

It was 1923 when Antonio Calligaris opened a small workshop in Manzano, Friuli. In this area, woodworking dates back to the eighteenth century and found its most iconic expression in the hand-made Marocca chair.

This was the beginning of a journey that, over a century, crossing epic changes in technology, design, and lifestyles, led Calligaris to become a global leader in home furnishings.

Between the 1950s and 1970s, with the Calligaris family still at the helm, the Company expanded and transformed into a modern industrial one without losing the ingenuity and attention to detail originating from its artisan birth nor the link with the warmest and most natural raw material: wood.

The 1980-90 decade was the period of most remarkable growth for the Friuli "chair district" and Calligaris played the protagonist role in the worldwide success of Made In Italy products. This allowed the Company to open its first branch in the USA in 1998. The collections expanded, becoming a complete home furnishing project: from the living area to the bedrooms.

The new millennium led to Calligaris's new adventure, confirming its international appeal and entrepreneurial skills as always, thanks to the implementation of a new branding and communication strategy that included opening its flagship stores in Milan, Paris, London, Munich, and Los Angeles.

What seemed unthinkable 100 years ago is now an everyday truth for a company that has never stopped believing in its dream and for all those who have contributed to making it come true, just as it is so for those who have made it part of their homes and lives: and the Calligaris story continues heading into tomorrow.

Surface treatment, which delays the absorption of water based stains.

"水性吸収遅延コーティング(非防水)"

MEASUREMENTS: The measures stated in this price list are of nominal sizes. Measurements can vary within the limits of a reasonable tolerance depending on the thickness of the chosen covers.

FABRICS: Each fabric batch can show colour differences compared with fabric samples and products manufactured at different times. As for the removable covers cleaning we recommend to follow the care instructions.

LEATHER: Any natural sign, characteristic and colour difference compared with samples is not to be considered as a defect but as a unique feature of real leather, therefore making it an authentic product.

Daily stories

2024 quick ship program Japan

connubia

Every home has stories of everyday life and extraordinary events,
that follows from one to another and that nourish
our memory and our emotions.

We live at our home environment with family, with friends.
It is a place where we share our belongings with each other.
Space where we are surrounded with people
that share with us our joy and serenity.

For this reason, Connubia has chosen to enter your homes,
where you can breathe your everyday life and embrace your daily habits.

We have looked into the way you live; we have followed
your daily rhythm and we have created furniture that could add value
to the time you spend at home.

This is our collection: bright, spontaneous, and colourful.
It is up to you to discover it and bring it to life with your stories.

Daily stories

About us

Connubia: a story of passions and ties

Connubia is a brand of Calligaris Group, the Italian reality that has been able to evolve in its 100 years of history thanks to the ability to skillfully amalgamate craftsmanship and innovation.

What motivates us is to make products that meet the taste of people and unite them. Products that create value with a special attention to the well-being of our planet.

We do this by combining the knowledge and skills of our artisans, handed down over the years to promising young talents, with new technologies, new materials and innovative development techniques.

All the materials we use comply with strict standards where quality and sustainability are essential elements in every step of the design and production process.

This is why Connubia products are beautiful, functional and made to last.

“REEF”

design Michele Menescardi

«The 100% green armchair by Connubia where every element has been designed with an eco-sustainable and circular approach.»

100 PLASTIC BOTTLES, RECOVERED FROM THE SEA, TO MAKE EACH REEF Made together with SEQUAL, the community that cleans the seas from plastic, Reef's special fabric, is made entirely with post-consumer recycled plastic, from the bottles recovered from the seas or destined for landfill.

A NEW LIFE FOR SOFAS AND MATTRESSES The padding is composed of recycled polyurethane foam derived from the agglomeration of bulky waste, such as sofas and mattresses, and from production waste from the textile and the furnishing industry.

ONLY WOOD GROWN IN RESPONSABLY MANAGED FORESTS Reef's frame is made using exclusively wood coming from forests managed responsibly according to strict environmental, social and economic standards provided by the FSC® (FSC-C002023) certification system.

Innovation +
Sustainability

DESIGN AWARDS
WINNER

A REAL HOME, yours

The Connubia collection in
the context of real homes... yours!

Here is your home!

It is not home of the architects, designers, polished advertisements, or home from television series.

We are talking about homes where we live every day, rooms often full of objects of everyday life, in which we eat, work, read, in short, we live our daily stories.

We have imagined a new photographic mood, a real experience inside the #Connubity, inserting the furniture of the new Connubia collection in the context of real homes... yours!

The home environment has been left unaltered, we do not want to interfere with it, your personal and authentic objects reflect ourselves, yourself.

Let's go in together.

Indoor collection finishes 仕上素材

All our materials comply with the strictest quality standards. For your pleasure, we have sourced fabrics which are not only delightfully tactile and stain-resistant, but ones which hold their colour over time. Our ceramic tops are exceptionally hard-wearing, easy to clean and utterly hygienic. Our wood is protected with special varnishing processes which create an effective barrier against staining. In addition, Calligaris S.p.a. is FSC certified, meaning that it only uses wood that comes from well-managed forests in compliance with strict environmental, social and economic standards.

WOOD TYPES

SOLID WOOD

Obtained by cutting the tree log through a mechanic process. The aesthetic features and grain pattern depend on the wood essence. Solid wood is usually varnished (finishing process) and reproduces the typical essence shades.

VENEERS

Veneer is obtained by using thin sheets of wood with different thicknesses which are taken from the best quality tree logs. Veneer layers are usually glued to a support and then stained accordingly. Veneer increases the quality of the products and delivers an excellent aesthetic result.

ウォールナット

MELAMINE FINISHES – THERMAL STRUCTURED SURFACES

Obtained by gluing plain coloured or patterned sheets which are spread on the visible layer with melamine resins on a wooden grain panel (support). Melamine coated panels allow a great variety of aesthetic solutions, they are durable and have excellent stability and resistance to wear and tear.

CERAMIC

LAMINATED CERAMIC-GLASS

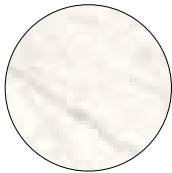

The ceramic-glass top is a self-holding product manufactured by coupling one ceramic plate (porcelain tile) to a tempered floating glass thanks to a special process carried out in autoclave. The ceramic plate thickness is 3 mm and is coupled with an 8 mm thick glass (for a total of 11 mm).

The porcelain tile is a ceramic material obtained using a mixture of stoneware composed by clay and valuable raw materials, which are mixed, body tinted, compacted whilst high pressure is applied and finally fired at 1200 °C.

The porcelain tile working surface features exceptional performances in terms of scratch, impact, stain, thermal shock and chemical resistance. It's easy to clean and very hygienic because it does not absorb liquids and does not release harmful substances.

Outdoor collection finishes 仕上素材

All our materials comply with the strictest quality standards. For your pleasure, we have sourced fabrics which are not only delightfully tactile and stain-resistant, but ones which hold their colour over time. Our ceramic tops are exceptionally hard-wearing, easy to clean and utterly hygienic. Our wood is protected with special varnishing processes which create an effective barrier against staining. In addition, Calligaris S.p.a. is FSC certified, meaning that it only uses wood that comes from well-managed forests in compliance with strict environmental, social and economic standards.

ECO-STONE

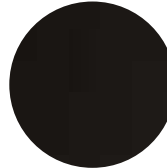

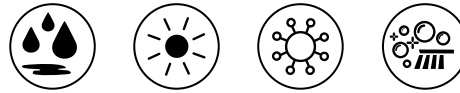

Made of recycled material, obtained from the recovery of fiber-glass and other post-consumption fibre-reinforced composites. They are re-aggregated at high pressure ensuring the product robustness and stability in all environmental conditions. Eco-sustainable and recyclable material at the end of life.

MULTILAYER LAMINATE TOPS (HPL)

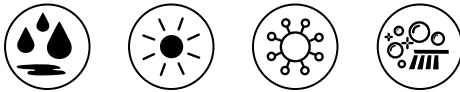

HPL (High Pressure Laminate) is a self-supporting material, with a 10 mm thick black visible edge. It's resistant to abrasion, bumps, scratches and common solvents and to the outdoors. It's antibacterial and, therefore, suitable for contact with food, moreover, it's easy to clean with common household detergents.

ブラック

CERAMIC

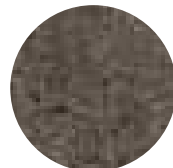

12 mm thick self supporting material made with the IN-SIDE technology. The main feature is the material and aesthetic continuity between edge and surface. It's bump, stain and scratch resistant. Ceramic versatility, ensures that surfaces retain their specifications even when exposed to heat, frost and UV rays. It's a completely natural product, compatible with food substances and does not allow the onset of mold.

METAL - ALUMINIUM

METAL Steel is a material with good strength and workability. Special cathaphoresis and powder or liquid coating treatments, tested to minimize the effect of external agents, make it suitable for outdoor use.

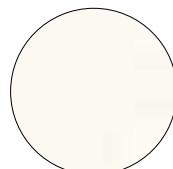

ALUMINIUM Aluminium is a light material with good mechanical properties. Special cathaphoresis and powder or liquid coating treatments make it suitable for outdoor use.

PLASTIC MATERIALS

Polypropylene is a thermoplastic polymer characterized by a good breaking load, a good thermal and abrasion resistance. Its formulation allows it to reduce the negative effects of the combined action of external agents such as water, light, etc. Material suitable for outdoor use.

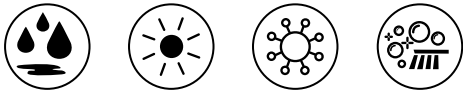

WASHABLE SYNTHETIC FABRICS

TORTUGA | 100% PP | Martindale 40.000 cicli/rubs - EN ISO 12947-2

Braid made of woven polypropylene yarn with internal reinforcement core. Designed for the outdoors it's UV rays and abrasion resistant, does not fear mold and mildew. Most of the dirt and stains can be cleaned if treated promptly. Material suitable for outdoor use.

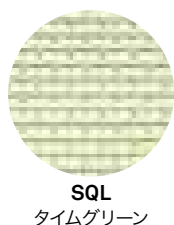

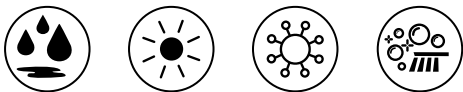

TRAMA | 72% PVC - 28% PL gr/m² 500 | Martindale 120.000 cicli/rubs - EN ISO 12947-2

This material offers good longevity due to its resistance to climatic conditions. It's made of a PVC-coated polyester fiber that makes it waterproof and easy to clean using non-aggressive detergents. Designed for the outdoors, it's UV ray resistant and does not fear mold and mildew.
